Technology Division

1978 Division Objectives

Since AIChE Council established the Computing and Systems Technology (CAST) Division on August 27, 1977, CAST's 1978 objectives concentrate upon the establishment of a well organized and effective division. The overall goals for 1978 are:

1. The completion of the first officer election and the establishment of the executive committee.
2. The consolidation of various national programming committee areas into one divisional programming board.
3. The development of an effective membership drive.
4. The formation of an awards committee and the formulation of an awards program.
5. The establishment of a team to study the need of and recommend the formation of special interest sections within the division.
6. The planning and execution of the first national CAST division dinner meeting at the 71st Annual Meeting in Miami.

A handwritten signature in cursive script, reading 'Vernon J. Sterba'.

Vernon J. Sterba, Chairman
Computing and Systems Technology Division
